Allowable Subject Matter

1. Claims 1-8, 10-17, 23-25, 27, 28 and 31-34 allowed.

2. The following is a statement of reasons for the indication of allowable subject matter: In claim 1, applicant has claimed a self-dispensing mechanism for dispensing a measured quantity of sample comprised of one or more disposable storage devices for holding the sample, a dispensing mechanism connected to each of one or more storage devices and in dispensing communication with the storage device for precisely dispensing sample from the storage compartment, and a driving mechanism that drives said dispensing mechanism wherein **the driving mechanism is positioned external to the dispensing mechanism and does not come into contact with the sample.**

The feature of the driving mechanism being external to the dispensing mechanism and not coming into contact with the sample is considered to be the feature of the instant invention which defines it over the prior art. The Examiner considers the references Wannlund and Nishioka to be the closest prior art. These references teach dispensing mechanisms that contain the storage elements, dispensing and driving mechanisms, but the driving mechanism in the references are located inside the dispensing device.
